

# Carpet Twirls

## **Twirls custom shape possibilities**

The carpet Twirls is based on an interlocking, repeating pattern. This results in almost infinite possibilities for the shape of each carpet. The original sun-like shape is thus but one of many shapes. The pattern can also be scaled so that a certain shape can be made to suit the room. Since each carpet is manufactured on order every carpet can be unique.

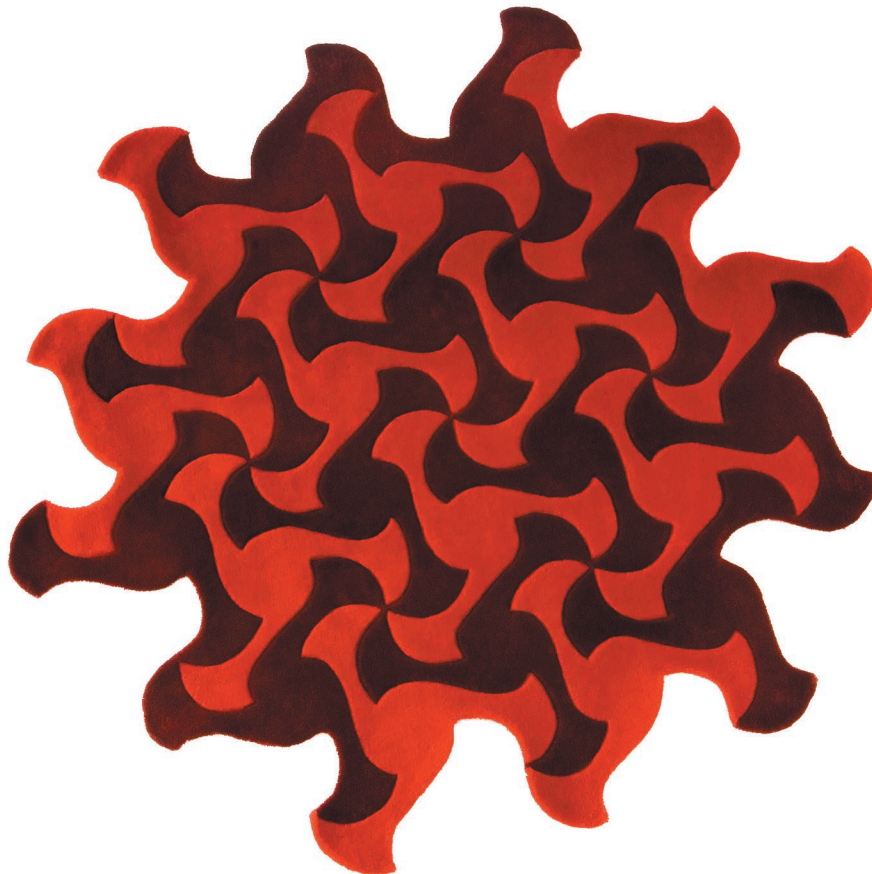

## **Material:**

Hand tufted carpet made from 100% New Zealand wool. In the production of a carpet at a-carpet 100% pure wool from New Zealand is used. The wool threads are "shot" by hand through an all-cotton fabric produced in Scotland and glued onto it using natural rubber from Malaysia. The rubber is later covered with a thin polypropylene fabric for protection and to hold the carpet in place on hard surfaces.

Twirls can be delivered anywhere.

## **Price:**

5025 SEK per square meter including VAT and including delivery in Sweden.
